

AKASH RAMESH

Full Stack Developer(.NET&Angular)

akashrameshoffcl@gmail.com | +91 9846147494 | Calicut-Kerala | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

Professional Summary

Full Stack Developer with hands-on experience in Angular and ASP.NET Core, building scalable web applications and RESTful APIs. Skilled in .NET Core, SQL Server, ADO.NET and Entity Framework with a focus on clean architecture, performance optimization, and maintainable code. Passionate about developing efficient and user-friendly solutions.

Technical Skills

Frontend: Angular, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, BOOTSTRAP, Angular Material, RxJS

Backend: .NET Core, C#, REST APIs, JWT Authentication, LINQ, RAG

Database: SQL Server, SQL, Entity Framework, ADO.NET

Tools: Git, GitHub, Swagger, Visual Studio, VS Code, SSMS

Concepts: OOP, Clean Architecture, Agile/Scrum, Performance Optimization

Soft Skills: Team Collaboration, Problem Solving, Adaptability, Time Management, Leadership, Communication

Professional Experience

Full Stack Developer Intern – Bridgeon Solutions LLP, Calicut

Aug 2025 – Present

- Developed and maintained 30+ RESTful APIs using ASP.NET Core and C#.
- Optimized SQL queries, improving database performance by up to 30%.
- Designed and managed SQL Server tables for efficient data storage.
- Integrated backend APIs with Angular for seamless data communication.
- Built reusable and responsive UI components using Angular and Tailwind CSS.
- Implemented JWT-based authentication to enhance API security.

Projects

NOVIO – E-Commerce Platform for Electronic Gadgets Selling

- Built a scalable full-stack e-commerce system with features like Products, Cart, Orders, and Wishlist, Star Rating and Reviews and Coupons on Products For a Specific Time and Payment Gateway with RazorPay
- Developed secure REST APIs using ASP.NET Core with JWT-based authentication and role-based access control. Tested and documented APIs using Swagger, Postman, and JWT tools.
- Designed backend architecture following clean architecture principles and scalable service patterns.
- Created and managed SQL Server databases using Entity Framework for efficient data handling.
- Implemented complete product and user management functionalities with admin-level controls.
- Integrated Angular frontend with backend APIs using NgRx for efficient state management.
- Built responsive and reusable UI components using Angular, Tailwind CSS, and RxJS.

- Designed an admin dashboard to manage Users, Products, Orders, Coupons.

BioZest – Application For People Who Follows Diet for Health (Under Maintenance work)

- Built a scalable full-stack e-commerce system with features like Star Rating and Reviews on Dietitians and Membership using the Payment Gateway with RazorPay
- Secured And Verified Authentication on Dietitian For Security and Genuinity
- Developed secure REST APIs using ASP.NET Core with JWT-based authentication , role-based access control , Dapper. Tested and documented APIs using Swagger, Postman, and JWT tools.
- Designed backend architecture following clean architecture principles and CQRS patterns.
- Created and managed SQL Server databases using Entity Framework for efficient data handling.
- Implemented complete product and user management functionalities with admin-level controls Like Dietitian Management and User Management , Revenue Chart
- Integrated Angular frontend with backend APIs using NgRx for efficient state management.
- Built responsive and reusable UI components using Angular, SCSS , Tailwind CSS, and RxJS.
